## PROFESSIONAL SUMMARY

Experienced Full Stack Developer and Information Technology Engineer with expertise in designing and building both Backend APIs and Frontend interfaces, along with cross-platform mobile apps using Flutter. Proficient in delivering scalable solutions, ensuring optimal user experiences for both end-users and administrators. Strong team leadership, project management, and problem-solving abilities, with a demonstrated ability to adapt to new technologies and environments quickly.

---

## KEY SKILLS

- **Full Stack Development:** Laravel, React.js, JavaScript, PHP, MySQL
- **Mobile App Development:** Flutter, Dart
- **Backend Development:** API design, Laravel PHP
- **Frontend Development:** HTML5, CSS3, JavaScript, React.js, Bootstrap
- **Databases:** MySQL
- **Version Control:** Git, GitHub
- **Team Leadership and Coordination**
- **Languages:**
  - Arabic (Native)
  - English (Proficient - C2)

---

## PROFESSIONAL EXPERIENCE

### Full Stack Developer (Freelancer)

*April 2023 – Present*

- Developed web applications by translating user requirements into technical specifications.
- Selected appropriate tech stacks and frameworks based on project requirements.
- Designed, implemented, and maintained scalable systems to meet project goals.
- Demonstrated the ability to quickly learn and apply new technologies.

## **Full Stack Developer – Poslix, Oman**

*November 2023 – March 2024*

- Enhanced functionality and improved the user experience of existing POS applications, including Poslix and QrLix.
- Focused on optimizing restaurant management features, boosting customer engagement.
- Led iterative development and maintenance of Laravel- and React.js-based applications, ensuring system scalability and performance.

## **Marketing & Sales Promoter – Syriatel Mobile Telecom, Syria**

*August 2019 – January 2023*

- Coordinated operations across multiple departments to ensure smooth promotional activities.
- Prepared and submitted detailed reports on marketing performance.
- Recognized for high performance and awarded a “Thank You” letter for dedication and efficiency.
- Achieved a 4.5/5 performance rating in the final evaluation.

---

## **EDUCATION**

### **Bachelor’s Degree in Information Technology Engineering**

International University for Science and Technology (IUST)

*2017 – 2023*

- GPA: 2.78/4.00
- Damascus, Syria

---

## **PERSONAL PROJECTS**

### **AIM (Artificial Intelligence Mentor)**

*January 2025*

Developed and deployed AIM, a cutting-edge AI-powered educational platform designed to personalize and enhance learning experiences for students, teachers, and educational institutions.

- Implemented interactive AI-driven quizzes using GPT-4 for real-time student evaluation, hints, and alternative questions.
- Built a scalable, user-friendly dashboard for teachers to monitor student progress and manage quizzes.

- Integrated PDF parsing for question extraction and AI evaluation of text and image-based questions.
- Designed the system to handle multiple user roles, including students, families, teachers, and schools.
- Ensured seamless collaboration and engagement through intuitive UI/UX design.
- [Reference Link: aim.edu-waves.com](https://aim.edu-waves.com)

### **EDU-Waves.com**

*July 2024*

- Full stack web app for an educational organization, including user registration, course applications, and research assistance.
- Integrated a dashboard for account and request management.
- [Reference Link: www.edu-waves.com](https://www.edu-waves.com)

### **Primesketch.net**

*June 2024*

- Developed a complete portfolio website for a construction services company.
- Built an owner dashboard for real-time project and service management.
- [Reference Link: www.primesketch.net](https://www.primesketch.net)

### **Engineering Zone**

*March 2024*

- Developed a full stack mobile app and web dashboard for an educational organization.
- Built using Flutter (mobile) and Laravel with React.js (web dashboard).

### **Early Fire Detection System (Graduation Project)**

*Jan 2023*

- Utilized deep learning and image processing for a smart fire detection model.

### **Basic Shop App**

*Mar 2023*

- Created a shop app with user authentication, product reviews, and cart features using Flutter.
- [Link to Code: Google Drive](#)

## **VOLUNTEERING EXPERIENCE**

### **National Union of Syrian Students – IUST University**

*Dec 2020 – Jan 2022*

- Assisted in organizing events and activities promoting student engagement.
